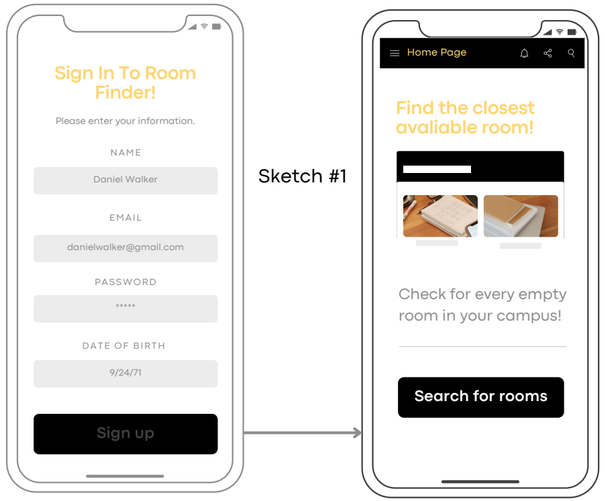
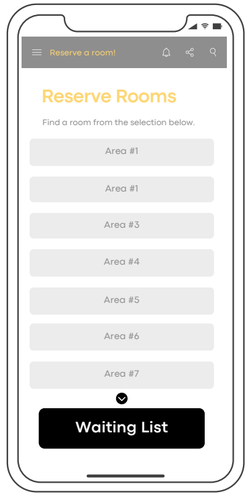
Sketches

How our app will work with sketches.



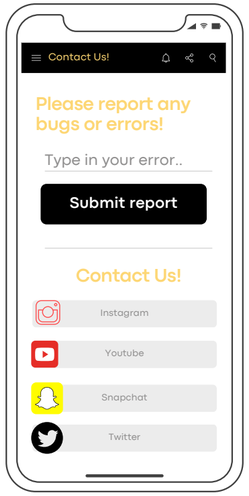
Sketch #1

The first sketch outlines the introduction of our app. The user must sign in so they will have personalized notifications and an app that suits them best. The introduction then takes you to the home page where you can find the closest avaliable room to your current location.



Sketch #2

On the drop down menu in the top left corner, you can drop down and access the reserve a room section. This section helps users find a room and reserve it so nobody else can take it at the selected date by the user. The section categorizes the rooms by area which helps usability.



Sketch #3

Here a user can submit a bug report which is very helpful in order to improve user experience and prevent errors. They can also contact us on all of our social medias in this section too.
